Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The amendment filed March 14, 2003 has been entered. Claim 5 is cancelled, and claims 1-4 are pending.

Specification

A substitute specification with the claims is required pursuant to 37 CFR 1.125(a) because the facsimile is illegible for printing.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gardner.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Vollhardt.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3743

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner or Vollhardt in view of Kessler.

Gardner or Vollhardt discloses all the claimed limitations except detachable plugs.

Kessler discloses a heat exchanger (Figures 5-7) comprising supply and discharge channels 33 connected a plurality of tube bores 31, and detachable plugs 32 for the purpose of ease of maintenance and assembly.

Since Gardner or Vollhardt and Kessler are both from the same field of endeavor and/or analogous art, the purpose disclosed by Kessler would have been recognized in the pertinent art of Gardner or Vollhardt.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Gardner or Vollhardt detachable plugs for the purpose of ease of maintenance and assembly as recognized by Kessler.

Response to Arguments

The substitute specification is not acceptable. Facsimile transmissions are not easily read by the scanner for printing.

Applicant's remarks have been considered but are not persuasive. Applicant's arguments are not commensurate in scope with the claims. The claims are not "picture" claims and do not ^{potentially} ~~patently~~ distinguish over the prior art of record. For example, claim 1 merely recites the bores "extending ... between a back face and a top face of the tube plate." As such, the bores 14 of Gardner extend "between" a back face and a top face of tube plate 4. Similarly, Vollhardt

Art Unit: 3743

discloses bores 9 extend "between" a back face and a top face of tube plate 4. Furthermore, Vollhardt discloses a tube plate 4 having a number of sockets 9 connected to a corresponding number of Y-piece units. A pair of elements 3 with Y-piece units at opposed ends is read as a tube, since the tube plate connection is only via welds to the Y-piece units.

The rejection of claims 3-4 in view of Kessler are deemed correct for lack of any argument by applicant, other than the reference does not remedy the shortcomings of the primary references.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
